

Vladyslav Samoilenko

DevOps Engineer

Ukraine | +380 66 037 7907 | vlad@samoilenko.engineer | [LinkedIn](#) | [Credly](#)

EXECUTIVE SUMMARY

DevOps Engineer with 3+ years of experience designing and automating cloud infrastructure, CI/CD pipelines, and Kubernetes-based deployments. Known for diving deep into complex problems and delivering pragmatic solutions with clear trade-offs. Strong problem-solver with a balance of efficiency and precision. Focused on solutions that work reliably, scale effectively, and meet business needs without overengineering. Skilled across AWS, Terraform, Ansible, and monitoring/observability platforms, with a passion for improving system reliability, automation and accelerating delivery.

SKILLS

- **Cloud & Orchestration:** AWS, Kubernetes (EKS, local), Docker, Helm
- **Infrastructure as Code & Automation:** Terraform, Ansible, Kafka, HashiCorp Vault
- **CI/CD & Version Control:** GitLab CI/CD, Jenkins, Git (GitHub/GitLab)
- **Programming & Scripting:** Bash, Python
- **Databases:** MySQL, MariaDB, PostgreSQL, Snowflake, RDS
- **Web & Application Servers:** NGINX, Apache, Tomcat
- **Monitoring & Logging:** LogicMonitor, SumoLogic, ELK Stack, Grafana
- **Networking & Security:** TCP/IP, DNS, OSI model, PCI-DSS compliance
- **Operating Systems:** Ubuntu, Debian, RHEL, CentOS, AlmaLinux

EXPERIENCE

DEVOPS ENGINEER Creatio	01/2026–Present
----------------------------	-----------------

MIDDLE AWS DEVOPS ENGINEER SoftServe	01/2025–01/2026
---	-----------------

- Reduced configuration bootstrap from 2 hours to 15 minutes by transitioning from Ansible Push via Jenkins to a custom-tailored Ansible Pull model with dynamic inventory, enabling daily automated updates, self-configuration upon node creation and reducing configuration drift across 100+ nodes
- Built and maintained 10+ monitoring dashboards
- Implemented Calendar Versioning (CalVer) across 10+ DevOps projects, standardizing release cadence and improving commit quality
- Migrated Apache load balancers and Email test servers from EC2 to EKS Ingress, decommissioning 15+ servers and lowering costs
- Developed 10+ observability modules, increasing monitoring reliability

JUNIOR AWS DEVOPS ENGINEER SoftServe	08/2023–01/2025
---	-----------------

- Resolved 95% of incidents within SLA via troubleshooting and root cause analysis, boosting reliability
- Migrated to Molecule-based Ansible testing on ephemeral EC2 via GitLab CI/CD
- Refactored 20+ Ansible roles for modularity, maintainability, and idempotency, cutting technical debt and preventing drift

- Automated SumoLogic deployment across 10+ environments, reducing manual effort by 40% and improving log visibility
- Supported AWS, Kubernetes, Vault, and Jenkins environments, improving deployment speed, reliability, and security
- Executed frequent deployments (3-5 per deployment week) with Helm and CI/CD pipelines, enabling business-critical demos

INTERN-TRAINEE AWS DEVOPS ENGINEER

05/2023–12/2023

SoftServe

- Maintained and supported automated infrastructure configuration, provisioning environments with IaC tools and ensuring stability of CI/CD flows.
- Performed on-call duties and contributed to the internal knowledge base, improving team troubleshooting efficiency and knowledge sharing
- Provisioned and supported relational databases (MariaDB, PostgreSQL, RDS) and managed DNS traffic control at the instance and subnet levels

DEVOPS ENGINEER

07/2023–12/2023

[StreetCode](#)

- Implemented a CI/CD solution with Jenkins.
- Updated frontend application to dynamically configure backend link at docker compose start-up from environment variable.
- Changed deployment architecture to include a domain name and SSL certificates for both frontend and backend.

TELECOM DEVOPS ENGINEER

05/2022–05/2024

National Aviation University

- Installed, maintained, troubleshooted, tested, and monitored 5G cores from multiple open-source projects (SD-CORE, Aether, GNBSIM, UERANSIM, Open5GS, and Free5GC) for research purposes.

EDUCATION

V. N. Karazin Kharkiv National University Master's degree, Computer Engineering Kharkiv	2024–2025
National Aviation University Bachelor's degree, Computer-integrated radio information systems and technologies Kyiv	2021–2024

CERTIFICATIONS

Certified Solutions Architect - Associate AWS Credly	2024
Associate Cloud Engineer Google Cloud Credly	2023
Skill Boost Google Cloud Profile	2022
